There is a great number of "Bad Law's" passed and implemented in Canada, within the past few decade's, that have to be repealed, or reversed. These "Law's" have to be replaced with sound, sensible law's guaranteeing the right's and freedom of law abiding citizen's of Canada.

Our Canadian Provinces must be untied under a common, workable agreement, and not fragmented upon the verge of breaking up as we now are, before any repatriation of a constitution be considered or undertaken.

The fireara owner's of Canada which represent 60% or better of the adult population, will take a very strong and determined stand on keeping and preserving the right's and freedom's, for a free and united Canada.
